25A0011	tert-Butyl peroxy(2-ethylhexanoate)	3006-82-4	Hazardous to the aquatic environment (Long-term)	Category 2	Environment	-	H411 : Toxic to aquatic life with long lasting effects	P273 : Avoid release to the environment. P391 : Collect spillage. P501 : Dispose of contents/container to ...	If chronic toxicity data are used, then it is classified in Category 2 due to being not rapidly degradable (In a degradation test, test substance changed in the test solution, and tert-butyl alcohol the degradation product remained (Biodegradation and Bioconcentration Results of Existing Chemical Substances under the Chemical Substances Control Law, 2002)), and 72-hour NOEC (r) = 0.017 mg/L for algae (Pseudokirchneriella subcapitata) (Results of Aquatic Toxicity Tests of Chemicals conducted by Ministry of the Environment in Japan (Ministry of the Environment, 2002)). If acute toxicity data are used for a trophic level for which chronic toxicity data are not obtained, then it is classified in Category 2 due to being not rapidly degradable (In a degradation test, test substance changed in the test solution, and tert-butyl alcohol the degradation product remained (Biodegradation and Bioconcentration Results of Existing Chemical Substances under the Chemical Substances Control Law, 2002)), and 96-hour LC50 = 4.6 mg/L for fish (Oryzias latipes) (Results of Aquatic Toxicity Tests of Chemicals conducted by Ministry of the Environment in Japan (Ministry of the Environment, 2002)). From the above results, it was classified in Category 12	Category 1	Environment	Warning	H410 : Very toxic to aquatic life with long lasting effects	P273 : Avoid release to the environment.
